

# Organizational Culture Unclear and Confusing Maintenance Procedures

Often we are lured into believing that maintenance procedures outlined by an aircraft or engine manufacturer must be correct. But history has proven this not always to be the case. This presentation will review some past mistakes made by well known manufacturing companies and how technicians discovered the errors. To attend this informative briefing, click the link below and register TODAY.

**Directions:** The Aviation Technology building is the first building on the right at the end of Aviation Drive. The break room is the first room on left after entering the front door.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
